- Python (Pandas, NumPy, Matplotlib, Seaborn)
- Data Visualization
- Data Cleaning & Transformation
- Data Analysis & Interpretation
- Data Modeling
- KPI Development
- Analytical Thinking
- Problem-Solving
- Attention to Detail
- Communication Skills
- Critical Thinking

INTERNSHIPS

Data Analyst Intern | DEVBYTE for Programming Services and Courses — Tanta, Egypt **Apr 2025 – Jul 2025**

- Analyzed sales and HR datasets to generate insights that supported data-driven business decisions and identified growth opportunities.
- Developed four interactive dashboards using Microsoft Power BI to support executive reporting and improve visibility of key performance metrics by 40%.
- Wrote advanced queries using SQL to extract, transform, and analyze large datasets efficiently.
- Utilized advanced functions and data manipulation techniques in Microsoft Excel for data cleaning, validation, and reporting.
- Ensured high data accuracy and integrity while transforming raw data into clear, actionable insights through visualization and analytical reporting.

PROJECTS

Sales and Profit Analysis Dashboard — Power BI Project | Link

- Developed an interactive dashboard using Microsoft Power BI to monitor sales and profitability metrics across branches and product
- categories. Implemented DAX calculations and dynamic filters to analyze performance and visualize key insights including $62.7K highest sales and $3.1K maximum profit.

Sales Overview Dashboard — Power BI Project | Link

- Built a comprehensive dashboard in Microsoft Power BI analyzing $20M total sales and $9.9M total profit (49.9% profitability).
- Applied time-intelligence DAX functions to track quarterly trends and support data-driven sales performance analysis.

HR Analytics Dashboard — Power BI Project | Link

- Designed a workforce analytics dashboard using Microsoft Power BI to analyze 689 employees and $1.4M in salary data.
- Visualized HR metrics including department distribution, gender ratio, and geographic employee distribution to support workforce planning.

Online Platforms Analytics — Power BI Project | Link

- Developed an interactive sales analysis dashboard using Microsoft Power BI to track revenue, profit, and product performance through dynamic visualizations.
- Implemented filtering and drill-down features to enable detailed analysis across product categories, time periods, and sales segments.

CERTIFICATIONS & TRAINING

- Data Analysis Diploma | MEC
- SQL Course | Harmash | Dec 2025
- Python Course | Harmash | Dec 2025
- Data Visualization: Empowering Business with Effective Insights — Forage | Dec 2025
- Data Analytics Job Simulation — Deloitte (via Forage) | Oct 2025
